In Acids Res. 284.317-4331 (2000).

In Catalyzes the acyloin condensation reaction between C acroms 2 and 3 of pyruvate and glyceraldebyde 3-phosphate to yield 1-deoxy-D-xylulose-5-phosphate (DXP) (By similarity).

In Acyloid Acyloid Acyloid Acyloid Sphots and Sphosphate and Glyceraldebyde 3-phosphate = 1-deoxy-D-xylulose 5-phosphate + CO(2).

COPACTOR: Thiamine pyrophosphate (By similarity).

In COPACTOR: Thiamine pyrophosphate (By similarity).

PATHWAY: Nonmevalonate terpenoid blosynthesis pathway; first step.

PATHWAY: Blosynthetic pathway to thiamine and pyridoxol; first
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          SUBŪNIT: Homodimer (By similarity).
